

# ANNOUNCEMENT

## 14th International Congress of Developmental Biology

### First Announcement

*Kyoto International Conference Hall, Kyoto, Japan, July 8–12, 2001*

The 14th International Congress of Developmental Biology, jointly sponsored by the International Society of Developmental Biologists and the Japanese Society of Developmental Biologists, will be held at Kyoto International Conference Hall, Kyoto, Japan, on July 8–12, 2001.

Congress symposia will include evolution of the body plan; embryo early patterning; organizing activity in embryogenesis; signaling in organogenesis; neural patterning; wiring the neural network; development of behavior; functional genomics in developmental biology; cell architecture; shaping and regenerating organs; creation of cell heterogeneity; breaking the body symmetry; differentiation of sexes; germ cells and gametogenesis; patterning and transcription factors; and problems of aging.

Congress workshops will include frontiers of bioimaging; emerging genetic technology in developmental biology; pattern generation in development: theory and practice; body organization in plants; development of appendages; generation of metamerism; cell and tissue engineering; molecular medicine and development; development under environmental effects; and historical synthesis of developmental biology.
